

## GAS ENERGY PRICE LIST STARTING FROM 1 OCTOBER 2021

### SCOPE OF APPLICATION

Gas energy prices shall apply to Tampereen Sähkölaitos Oy's gas sale contracts. Gas sale is subject to the general terms for the retail sale of gas.

The pricing is based on the Natural Gas Market Act and the related decrees as well as the decisions and guidelines issued by the Energy Authority.

The price list is valid for all customers covered by the obligation to supply in the gas distribution network of Tampereen Sähkölaitos Oy. The pricing is effective until further notice from 1 October 2021. The listed prices are exclusive of tax.

### PRICE OF GAS

The pricing is effective until further notice. The consumption price of gas is determined based on the higher heating value (HHV) of natural gas as follows:

- **Consumption fee [€/MWh]** is determined by the gas energy consumption at the site of supply. The consumption category (1 to 4) of the site of supply is determined based on its annual gas consumption.

The consumption fee is determined by the Trading day index and the category-specific fee according to the table below. Trading day is a monthly updating gas price index.

Consumption category	Annual energy at the site of supply [MWh]	Fee added to the Trading day-index [€/MWh]	Customer's gas consumption fee [€/MWh]
1	0 - 1 000	11,0	Trading day index + 11,00
2	1 000 - 10 000	9,5	Trading day index + 9,50
3	10 000 - 25 000	8,0	Trading day index + 8,00
4	> 25 000	7,6	Trading day index + 7,60

The customer's consumption fee includes national network costs, consumption profile costs, the supplier's margin and gas energy procurement costs.
